Registered Certified Backflow Device Testers

All backflow prevention assemblies installed in the City of Wyoming must be tested on frequencies set by the CCC Department. This testing must be performed by a Plumbing or Mechanical Contractor who is an **ASSE (American Society of Safety Engineers) certified tester** and their current test gauge must be certified for accuracy annually as well. **We require that all device test results be submitted using our web-portal as we no longer accept device forms by email, mail, or fax.**

Below is a current list of companies (as of 5/1/2020) that have met our requirements and are registered to test and electronically submit data for devices in the City of Wyoming. This list is provided as a courtesy and is not intended as an endorsement; the businesses listed below have no affiliation with the City of Wyoming. It is the responsibility of the facility/home owner to hire an ASSE certified tester and pay for any services rendered. It is recommended to verify that they test residential devices and call more than one contractor for price quotes and comparisons before making a selection.
