**State of Michigan
Certified Backflow Device Testers**

All backflow prevention assemblies installed at commercial facilities must be tested annually. This testing must be performed by a Plumbing or Mechanical Contractor who is certified by the State Plumbing Board and who has had their test gauge certified within the past year.

Below is a list of companies which employ certified testers that have recently tested backflow prevention assemblies in the City of Wyoming. This is not a complete list, is provided as a courtesy, and is not intended as an endorsement or referral. The businesses listed below have no affiliation with the City of Wyoming.

It is the responsibility of the business owner to hire a contractor and pay for any services rendered. It is recommended to call more than one contractor for price quotes and comparisons before making a selection. When selecting a contractor, please verify that they are certified to perform the appropriate test.
